SUMMARY

Full stack developer with 3+ years on a bank's core system (Oracle, SQL and PL/SQL), where every change touches real financial data and must be minimal, tested and traceable through tickets. On my own time I design, build and ship web products running in production: PostgreSQL data modeling, row-level security (RLS), multi-tenant architecture, Next.js and TypeScript interfaces, AI integrations and deployment. I am looking to join a technology team where I can contribute on backend and databases as well as on end-to-end web applications.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, Next.js, HTML, CSS, Tailwind CSS

Backend: Python, Supabase (Auth, Storage, RLS), REST APIs, authentication and role-based access control

Databases: PostgreSQL, Oracle Database, SQL, PL/SQL, Row Level Security, query optimization, views and stored procedures

Integrations: Claude API (receipt scanner and chatbot), Meta Pixel and Conversions API, Shopify (Liquid)

DevOps & tools: Git, GitHub, Netlify, Vercel, Linux VPS, Cloudflare, Jira

Architecture & practices: Data modeling, multi-tenant architecture, row-level security (RLS), parameterization instead of hard-coded values, dependency analysis, version control and ticket-based workflow

Domain: Core banking, interest and installment calculation, regulatory and delinquency reporting, root cause analysis

PROJECTS

WalletIQ | Personal finance app (live)

JavaScript, Supabase, PostgreSQL, Claude API, Netlify

- Designed the PostgreSQL schema with row-level security (RLS), authentication and a 30-day free trial.
- Integrated the Claude API for an AI receipt scanner and a financial chatbot; multi-currency support for Paraguay and LATAM.

SalesClose | Multi-tenant SaaS to close sales over WhatsApp (live)

JavaScript, Supabase, PostgreSQL, Netlify

- Multi-tenant architecture (organizations, leads, conversations and templates) with RLS data isolation.
- Tiered USD plans with local-currency equivalents and a 14-day free trial.

Multi-business ERP | Management system (in progress)

Next.js, TypeScript, Tailwind CSS, Supabase, Vercel

- Per-business data isolation and role-based permissions (admin, seller and operator).
- Configurable commissions, inventory with unit conversion and an explicit split between revenue, profit and investment.

Custom Shopify store | E-commerce in Paraguay (live)

Shopify, Liquid, JavaScript, CSS, Meta Pixel

- Liquid theme with reusable sections, checkout payment rules by shipping zone and purchase tracking with Meta Pixel and Conversions API.

WORK EXPERIENCE

Data & Systems Developer (Core Banking Databases)

January 2026 – Present

Zeta Banco S.A.E.C.A., Asunción, Paraguay

- Diagnose and resolve core banking issues (loans, collateral, cards and accounts) using Oracle SQL, PL/SQL, Oracle Forms and Reports, managing work through Jira tickets.
- Identified the root cause of installment interest mismatches, traced to the operation date used when generating the payment schedule.
- Proved with data that a join with repeated rows was duplicating capital in a credit risk report and fixed it with a DISTINCT subquery.
- Extended a PL/SQL credit bureau delinquency-reporting package to include checking and past-due accounts without changing the existing loan and card logic.
- Added business rules to loan inventory views by analyzing dependent objects, and replaced hard-coded values with parameters by module, currency and branch.

Data Analyst & Systems Support

February 2023 – January 2026

Zeta Banco S.A.E.C.A., Asunción, Paraguay

- Optimized slow SQL queries with correlated subqueries and multiple joins on loan and credit tables.
- Analyzed historical account tables to detect and explain balance discrepancies.
- Fixed a division-by-zero error (ORA-01476) across six PL/SQL objects in a liquidity ratio report.

EDUCATION

B.Sc. in Computer Engineering (in progress)

2023 – 2029 (expected)

School of Engineering (Facultad Politécnica), Universidad Nacional de Asunción (FP-UNA)

LANGUAGES

Spanish: native. English: intermediate (B1), fluent reading of technical documentation.
